OBJECTIVE

Entry-level software developer with a strong foundation in programming and web development. Build user-friendly and efficient applications. Skilled in Java, JavaScript, and modern frameworks. Looking to join a software development team where I can apply problem-solving skills, work on impactful projects, and continue growing as a software professional.

SKILLS AND INTERESTS

Programming Languages	Java, Python, JavaScript
Frontend Technologies	HTML5, CSS3, React.js, Node.js, Express.js, Django
Database	SQL, MongoDB
Version Control System	Git, GitHub
Soft Skills	Critical thinking, Data-driven decision-making, Project ownership

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

2022 - 2026

Shah & Anchor Kutchhi Engineering College; CGPA: 8.49

EXPERIENCE

Java Developer | Mindstein, India

August 5, 2024 - November 4, 2024

- Built a desktop application using Java Swing, JDBC, and SQL for streamlined data management.
- Implemented user-friendly GUI components and integrated them with backend logic using Core Java.
- Integrated the application with a relational database using JDBC, enabling fast and seamless data retrieval and storage.
- Debugged issues and optimized performance to ensure smooth and responsive user experience.
- Designed efficient SQL queries to handle CRUD operations and improve data handling speed.

PROJECTS

Weather Website

- Built a dynamic and interactive weather website using HTML, CSS, and JavaScript.
- Leveraged the OpenWeatherMap API to fetch real-time weather data for any location in the world.
- Allows users to check current weather conditions, forecasts, and other meteorological information.

Dental Clinic Management System

- Designed and implemented a web-based clinic management system using Django, HTML, and CSS.
- Streamlined operations by automating patient record keeping, appointment scheduling, and treatment history tracking.
- Improved service efficiency and reduced manual errors for clinic staff.

Real-Time Chat Application | (React, Node.js, Socket.IO, MongoDB)

- Developed a real-time chat application using **React** for the frontend and **Node.js with Express** for the backend, implementing **Socket.IO** for bi-directional WebSocket communication.
- Enabled **instant messaging, user authentication (JWT-based),** and used **MongoDB with Mongoose** to manage users, contacts, and messages.
